Location: Masdar City, Abu Dhabi, UAE
Linkedin: Ahmed Attia

Education

- **Mohamed bin Zayed University of Artificial Intelligence** — Abu Dhabi, United Arab Emirates
  Master of Science in Natural Language Processing; GPA: 3.7/4.0 — *Aug 2024 - May 2026*
- **Kafr El-Sheikh University Faculty of Artificial Intelligence** — Kafr El-Sheikh, Egypt
  Bachelor of Science in Artificial Intelligence; GPA: 3.6/4.0 — *Aug 2020 - Jul 2024*

Experience

- **Research Engineer at GenBio AI** — Abu Dhabi, UAE
  Full-time — *Sep 2026 - Present*
  - Improved the speed of Model Foundry, an agentic system for cell perturbation response, by **20%** and reduced token usage by approximately **40%** by combining lightweight decision models with rule-based methods.
- **Student Resident at MBZUAI – Institute of Foundation Models** — Abu Dhabi, UAE
  Part-time — *Feb 2026 - May 2026*
  - Led the reinforcement learning reasoning post-training of **Jais-3**, fine-tuning SFT checkpoints on Mathematical Reasoning, Code Generation using Hugging Face's **TRL**.
  - Helped curate the Arabic Math and Code datasets tailored to Jais-3.
  - Ran distributed training experiments on a **SLURM** cluster nodes of **H100** GPUs.
  - Designed and implemented the Arabic custom reward functions for Math and Code experiments.
  - Collaborated and effectively communicated with the post-training team to lift Math and Code performance from **39% to 46%** after rounds of SFT and RL with **GRPO**.
- **R&D Machine Learning Engineer at Yalla Group Limited** — Dubai, UAE
  Full-time — *May 2025 - July 2025*
  - Developed a deep reinforcement learning agent for Draw Dominoes using Neural Fictitious Self-Play (NFSP), achieving a 72.5% win rate against a uniform random baseline (1.5% above the previous benchmark).
  - Built a distributed Actor-Learner architecture with **Ray** (24 parallel actors, centralized gradient aggregation at the learner), deployed on Google Kubernetes Engine (GKE) on GCP.
- **Natural Language Processing (NLP) Engineer Intern at SpeedLegal** — Remotely, California, USA
  Full-time — *Jul 2022 - Jun 2024*
  - Built an MVP in 2 months, as part of a team, to automate contract review and help lawyers extract key information.
  - Developed **RAG** pipelines with **GPT-4**, evaluated using precision@k, recall@k, and MRR (96% recall@6 on NDA agreements).
  - Fine-tuned BERT for extractive question answering on license agreements (20% exact match, 65% clause-level accuracy), reducing contract review time by approximately 15 minutes.
  - Used **LIME** to explain classification decisions on legal text, improving model transparency.

Publications

- **HyperBrowseComp: A Multilingual and Multimodal Stress Test for Web-Browsing Agents** *2026*
  - Alham Fikri Aji et al. (17 authors, including **Ahmed Attia**). ArXiv Preprint
- **Improving Low-Resource Machine Translation via Round-Trip Reinforcement Learning**
  Ahmed Attia*, Alham Fikri Aji* *2026*
  - ArXiv Preprint
- **Accurate and Diverse LLM Mathematical Reasoning via Automated PRM-Guided GFlowNets**
  Adam Younsi,* ***Ahmed Attia****, Abdalgader Abubaker, Mohamed El Amine Seddik, Hakim Hacid, Salem Lahlou* *2025*
  - ArXiv Preprint

Skills Summary

- **Languages and Frameworks**:
  C, Python, MongoDB, Unix scripting, Numpy, Pandas, Scikit-learn, PyTorch, Redis, Docker, Ray, Google Cloud Platform (GCP), GitLab CI, Streamlit, Design Patterns, RESTful API, SOLID principles, Object Oriented Programming, Agile Software Development, Reinforcement learning, Information retrieval, Distributed Training.
- **Languages**:
  Arabic: Native, English: Fluent (IELTS 7.5, C1), German: Basic
